Seams that never rip.

Seams that always rip.

JAMES LINTON & CO.

MONTREAL

MANUFACTURERS OF RIVETED SEAM BOOTS AND SHOES

And Hand-made Stoga Kip & Calf Boots.

Our Patent Riveted Seam Boots and Shoes supply a long felt want in the trade.

One pair warranted to wear as long as two pairs with ordinary seam that always rip, it will require but little argument on our part to prove that the weak point in all Factory made Boots and Shoes is in the seaming of the uppers.

We venture to say that fully 40 per cent of all leather and other material used in factory made goods is lost from this cause alone.

Since the introduction of our Patent Riveted Seam it is no longer necessary to send to the shoemaker for repairs, or the mother of the family to endeavour to do the same at home with needle and thread, often times we fear with poor results, all this trouble and expense is at an end by the introduction of our Patent Seam.

Every man knows that the shoe bill is a heavy one, it can now be reduced one-half, one pair with our Patent Seam is equal to two pairs with ordinary seam.

Please read the following testimonials from some of our customers, these speak for themselves.
